Lab 19

I declare that the following source code was written by me, or provided by the instructor for this project. I understand that copying
source code from any other source constitutes cheating, and that I will receive a zero grade on this project if I am found in violation of this policy.
----

1. Ask user if they would like to roll the dice.
    2. Store user response
    3. If user response is not Y or N:
            4. display "You must enter either Y or N"
            5. Go back to #2
------------do while loop
    6. If user response is Y:
            7. Generate two random numbers between one and six
            8. If both number are six display: "You rolled boxcars."
            9. If both numbers are one display: "You rolled snake eyes."
            10. If neither #8 or #9 are true display "You rolled (display both numbers)
            11. Ask the user if they would like to roll again.
            12. Go to item #2
----
    7. If user response is N end program.
